Assign to:

Tutor 1

## Student Overview

Visualizing student learning data that extracted from various data sources, e.g., Lecture recording, tutorial material, assessment, class attendance, etc.

## Student Feedback

Student feedback for teachers, including student's feelings, needs, questions, reflections, suggestions, etc.

## Teacher feedback

This is the area where teachers can provide feedback to students.  
(NOTE: Feedback language detection and advising system will be incorporated, e.g., you could use a more positive word, such as.....)

## Action Plans

Student action plan based on feedback, allowing teachers to make comments or provide additional feedback based on action items.

## Feedback History

Feedback 1  
Feedback 2  
Feedback 3

 Notify the research team of data/data model/algorithm issues.
